

Statement of Motivation

I am applying for the Erasmus+ mobility program because it offers an excellent opportunity to further develop my academic knowledge and gain valuable international experience.

As part of my Master's degree program in Electrical Energy Systems and Electromobility at Ulm University of Applied Sciences (TH Ulm), I will participate in a two-week Photovoltaics course in Sweden. This course is a mandatory component of my studies and provides an important opportunity to deepen my understanding of renewable energy technologies and photovoltaic systems. The knowledge and practical experience gained during this course will complement my academic education and contribute to my future professional development.

In addition, studying abroad will allow me to experience a different educational environment, collaborate with international students, and strengthen my intercultural communication skills. I am convinced that these experiences will broaden my perspective and prepare me for future challenges in an increasingly international field.

I am highly motivated to participate in this Erasmus+ mobility and make the most of this valuable academic and cultural experience.

Ulm, June 30, 2026
